

## Acer TravelMate C100

Convertible, lightweight system lets highly mobile users input data by the most convenient method - keyboard or stylus.

### Features:

- notebook/tablet pc
- 3.1 lb
- less than 1.2" high
- port replicator available
- wireless available
- RJ-11 and RJ-45 jacks

Designed with full consideration of people's most natural and practical computing needs, the Acer TravelMate C100 Convertible Tablet PC revolutionizes mobile computing by uniting the notebook PC of today with the tablet computer of tomorrow. Exceptional portability and multiple methods of input are among many innovative features. The slim and light case houses a wide array of ports, while the convertible screen and tablet operating system make this a versatile computer that looks stylish too.

As either a standard notebook or Tablet PC, your TravelMate C100 offers a whole new take on a world of possibilities.

1. Specifications vary depending on configuration.
2. The size and weight of individual units may differ, depending on configuration.
3. Actual battery life may vary, depending in usage and configuration. Battery life claimed above is tested with a LCD brightness of 5 nits.
4. PTT applicable countries: N. America: Canada, USA; Asia: China, Hong Kong, Japan, Korea, Malaysia, Singapore, Taiwan; Europe: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Holland, Iceland, Italy, Luxemburg, Norway, Portugal, Spain, Sweden, Switzerland, UK; Oceania: Australia, New Zealand.
5. Available in selected languages.
6. ORiNOCO Client Manager is available with Acer InviLinkT 802.11b wireless LAN equipped models.
7. Office Pack® provides inking capability to Microsoft® Office® XP productivity software.

In a continuing effort to improve the quality of our products information in this brochure is subject to change without notice. Images appearing are only representations of some of the configurations available for this model. Availability may vary depending on region.

As a phenomenon known to thin-film transistors (TFTs), liquid crystal displays (LCDs) commonly exhibit a small number of discolouration dots, as so-called "non-conforming pixels". Acer would like its customers to understand that this phenomenon is a limitation of TFT LCD technology, not a product defect, and as such is not covered by Acer's warranty.
